Data Engineer & Analyst

PROFESSIONAL SUMMARY

Data Engineer & Analyst with four years of experience building reporting, analytics, and automation solutions using Power BI, SQL, Python, and Streamlit. Proven success delivering scalable business intelligence tools that improve operational visibility, streamline processes, and support data-driven decision-making across manufacturing operations.

CORE TECHNICAL SKILLS

Power BI • SQL • MySQL • Python • Streamlit • Amazon RDS • REST APIs • ETL • DAX • Power Query • Data Modeling • Business Intelligence • KPI Reporting • Excel

PROFESSIONAL EXPERIENCE

ACCURATE MANUFACTURED PRODUCTS GROUP (AMPG)

Data Engineer & Analyst | Oct 2022 – Present

- Developed and maintain 6+ Power BI dashboards used by leadership to monitor production, labor, inventory, customer demand, and manufacturing performance including 1 companywide report seen on a regular basis by 90+ employees.
- Designed SQL reporting and ETL solutions across 20+ tables in 3+ Amazon RDS MySQL databases.
- Built 8+ Python and Streamlit applications that automate manufacturing scheduling, deployment validation, and operational workflows.
- Implemented 3+ Paycor API integrations to automate employee, labor, and workforce reporting.
- Implemented 8+ TBE (The Business Edge) ERP API integrations to automate inventory, order, shipment, and reporting workflows.

AERO INDUSTRIES

Inventory Control Assistant | 2019 – 2022

- Managed warehouse inventory organization, location tracking, labeling initiatives, and operational support activities.

AERO INDUSTRIES

Configurator Programmer | 2020

- Participated in software configurator development, testing, validation, and implementation efforts.

SELECTED PROJECTS

- Customer Priority Dashboard (Power BI, SQL, MySQL) – Developed an integrated reporting solution combining customer demand, open orders, inventory, PPO, and production data.
- Manufacturing Scheduler Control Center (Python, Streamlit, MySQL) – Designed and deployed a centralized platform supporting scheduling workflows and operational controls.
- Paycor Workforce Reporting Integration (Python, REST API, MySQL) – Implemented automated workforce reporting solutions integrating employee, labor, department, and timecard data.
- Production Scheduling Automation (Python, SQL) – Automated manufacturing scheduling and validation workflows.
- Inventory & Labor Analytics (Power BI, SQL) – Delivered KPI reporting solutions for inventory, labor utilization, and workforce performance.

EDUCATION

Indiana University Indianapolis (formerly IUPUI)

Bachelor of Science in Informatics | December 2024

- Minor: Games Design and Development
- Certificates: Human Computer Interaction (HCI), Applied Information Science

HONORS & RECOGNITION

- 2026 Junior Achievement Indy's Best and Brightest Finalist – *Manufacturing*
